idk about you, but this is straight out of pewdiepie the legend of the brofist for me.. Cute little platformer. Could have charged money for it tbh.. Exo TD isn't terrible. It's a basic tower defense game that looks and sounds a bit sloppy and overly simplistic, but you'd expect that from EA.

The 3d aspect of the game is a nice touch. Defending a globe against ships that are flying around does look a lot better than your usual 2d TD game.

The problem is that this isn't worth anything like what they're asking for. Not even close. This is a \$3 game. Anything more than \$5 and you're seriously overpaying.. Got

ClassicV10. The DLC adds several new scenarios, and new maps that focus on larger team battles which are great for casual play against the AI with some friends. The new frigates help introduce more options in the early game as well, as previously each race had only a couple of options for low tier combat units.. This game is good (for the time it was made) and was enjoyable in the end. But the controls are done very awkwardly. They do have grip toggle now which makes holding the axe and guns better but you can't throw objects when in that mode. Therefore, what I did was use toggle grip when I had to do the levels with guns and turned it off when I did the levels that needed stealth. Now if you have a gun in non toggle grip mode when you hold the gun you have to hold trigger and shoot with track pad which is dopey. Now you understand why I did what I did. If you have a large play space it is super immersive as you can literally walk/crawl behind the syrens quietly with your own body which is exhilarating. It was like really being there and with the tension. Basically you can throw things to distract the Syrens, kill or hurt them if you have weapons which are hard to come by or die if they see you. :-). I am not sure if chapter 2 was included with what I played which I doubt as there was no shooter mode as far as I noticed. Regardless of that fact if you get this on sale I think you can get some enjoyment out of it and also have a decent horror/thriller game to play at parties or showing off VR to friends if you show them how to do the controls like I explained. It does seem like this is the final release but none the less I recommend it on sale only. My rating 6/10. Mainly because of the controls and lack of further development. There is an ending to the game so this part is finished.

One further suggestion: When you first start the game and if you want to do the tutorial choose smooth walking first because I think the tutorial is broken for the teleport mode. And for the tutorial choose toggle grip so you can shoot the guns "normally". Haha. Then switch back to the other modes if you want to use them. Remember you can't effectively throw stuff in toggle grip mode. It just drops stuff out of your hand if you try to throw. Still with all these quirks on sale I think you should not pass up this experience if you like tension thrillers/horror stealth games.

First play video here if you want to see the full playthrough. There is a lot of trial and error in it. Not edited. The spoiler is at the end so if you don't want to know what happens then don't watch the last 10 minutes. Thanks and enjoy. :-)

<https://youtu.be/Qd5aOFOIP18?t=323>. I came over to this game after playing my first Atlus game Persona 5. I heard about Catherine Fullbody coming out in september and seeing this game on the atlus website lead me to buy it. It was well worth the money. Crazy good story and addicting puzzles. Atlus puts in good work into their games and it shows with a game like this being 8 years old!. A very addictive and entertaining game that has kept me up for past few nights now. I have been playing with speedpad/keyboard very comfortably and the game delivers exactly what it advertises

[I love how you can mix/match weapons into different combinations though wasn't expecting lazer unicorn stampede =D +1 for all the corny antics and humorous dialogue](#)

[The only oddity imo is the "menu system"..enter..or r-shift or shift then enter?](#)

[...other than that Im having a fun time playing.. ty-. I have owned this game for over two years and i bought two seperate editions for each computer when \(if i remember correctly\) i bought the basic Armada 2526 and the expansion Supernova at \\$20 a pop. Twice, once for each computer. So now i have bought it on Steam and i have laid out \\$100.](#)

[Now i can play it on either computer without porting problems.](#)

[The game is by far more interesting to me as my years of playing it go on.](#)

Yes, it needs some creative tinkering to make it an even better game in forms of management. I would love to be able to find just the planets that have reserch staions that have become obsolete so i can both remove them and replace them without going through hundreds of planets.

But if you like broad expansive strategy as well as figuring out how to make an economy work I think you will like this "game of chess with few limits.". I enjoyed it for a few minutes, but then got bored with how repetitive it is. As a roguelike I expected a lot more variety. Feels like more like a demo than an actual game, and it's probably better suited for early access. I did like the simple story about saving princesses. It's a nice refreshing change of pace to the convoluted mess that a lot of games try to do nowadays. Overall not a fnished experience.

It is basically a trial and error process until you realize where you are supposed to jump and when do you flip yourself. Some may argue this is where the challenge comes in. Great Game. I just spend 115 hours and finished the game. Had a great time, and definitely got my money worth.

I am really surprised that a RPG game is of such a high level.

The story line is well thought out, and the game mechanics is interesting. I also loved the concept of monster notes too. You can turn monster nodes on for grinding, and off if you need to explore.

I would highly recommend this game to old school rpg players.. great game along the same lines as Crimsonland type games. Love the way each game builds on the previous one in mechanics and lore terms. This add-on is secunda. I'd try to return it next day from buying it and in answer steam said i'd use it too long -11 hours - (that is not true - i'd use FSX SE so long after buying this add-on!!! - this I used very shortly and only trying to make it work like my many other (good) _PURE_ ORBX FTX products).

This is not working - I'd want my money back as promised in STEAM RULES!

thx.. This add-on airport is pretty good and in my eyes gets a 8V10. The taxi-ways are extremely detailed and have the same layout and color as the real ones! But yes I would reccomend this add-on to anyone who's looking for a smallish, medium sized international airport with excellent detail!
